

Sirius and Djinn: Infrastructures to Study Emerging Intelligent Web Services

<http://lucida.ai>
ClarityLab
University of Michigan

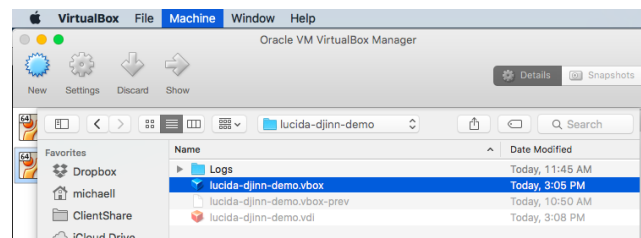

1 Setup Prerequisites

1. Install VirtualBox
2. Install Chrome Web Browser

2 Configure VirtualBox

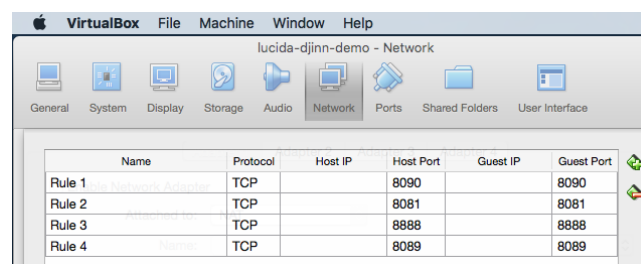

1. Unpack `lucida-djinn-demo.tgz` into `~/VirtualBox VMs/`
2. Add `lucida-djinn-demo.vbox` to VirtualBox

- Machine → Add

3. Configure port forwarding

- Machine → Settings → Network → Adapter 1 → Advanced → Port Forwarding

3 Getting into VirtualBox

1. Boot the VirtualBox instance and login
 - Username: demo
 - Password: demo
2. Open Terminal application inside the VirtualBox
3. Go into the source code directory
 - `$ cd ~/hpca-demo/source-code/lucida/`
4. Start Lucida services
 - `$ docker-compose up`
